TITLE: WORKSHOP REGISTRATION & CONFIRMATION APP

GITHUB LINK : <https://github.com/itz-boomika/my-react-app>

1.ABSTRACT

The Workshop Registration & Confirmation App is a React-based web application designed to simplify the process of registering participants for workshops. The application allows users to enter their details, stores participant information, provides instant confirmation messages, and prevents duplicate registrations. This system helps institutions manage workshop registrations efficiently.

2.PROBLEM STATEMENT

Many institutions manage workshop registrations manually, which can lead to errors, duplicate entries, and difficulty in maintaining participant records. This project provides a digital solution to manage registrations easily.

3. OBJECTIVES

- **To create an online workshop registration form**
- **To store participant details securely**
- **To display confirmation after successful registration**
- **To prevent duplicate participant entries**
- **To improve registration management**

4. PROJECT SCOPE

The application allows users to register for workshops and view registration confirmation. It can be enhanced in future with login features, email notifications, and database integration.

5. TECHNOLOGIES USED

- **React JS**
- **HTML**
- **CSS**
- **JavaScript**
- **React Hooks (useState)**
- **VS Code**

6. APPLICATION FLOW

- 1. User opens the workshop application**
- 2. User fills registration form**
- 3. System validates entered details**
- 4. Participant details are stored**

5. Duplicate registration is checked

6. Confirmation message is displayed

7. KEY REACT CONCEPTS USED

- **Components:** Used to divide the application into reusable parts.
- **useState Hook:** Used to manage form data and participant details.
- **Event Handling:** Used to handle form submission and user actions.
- **Conditional Rendering:** Used to display success or error messages.

8. EXPECTED OUTPUT

INITIAL PAGE:

The screenshot displays the initial page of the 'Workshop Registration & Confirmation App'. The app has a purple header with a graduation cap icon and the title 'Workshop Registration & Confirmation App'. Below the header, there is a subtitle 'Register for the workshop and view participants list'. The main content area is divided into two sections. The first section, titled 'Register for Workshop' with a person icon, contains a text input field labeled 'Enter Participant Name' and a blue 'Register Now' button. The second section, titled 'Participants List' with a group of people icon, shows a message: 'No participants registered yet. Register a participant to see them here.' with a person icon.

SUCCESS MESSAGE:

 **Workshop Registration & Confirmation App**

Register for our exciting workshops and enhance your skills!

★

✓ Registration Successful! Thank you Boomika P for registering.

9. CHALLENGES FACED

- **Managing form data**
- **Handling duplicate entries**
- **Designing a responsive interface**

This challenges were solved using React state management and proper validation.

10. LEARNING OUTCOMES

- **Learned React application development**
- **Improved frontend design skills**
- **Understood component-based programming**
- **Learned form handling and validation**

11. CONCLUSION

The Workshop Registration & Confirmation App successfully provides an easy and efficient way to manage workshop registrations. The project reduces manual work and improves accuracy through a simple React-based interface
